isbn:9780443069123

At last a concise pocketbook covering all the essential anatomy you need to prepare for your exams and clinical placements. All the areas of the body are covered by region and include bones, muscles, joints as well as movement, palpation, origin, insertion, and nerve supply. Common injuries, radiographs, MRI scans, CAT scans showing normal vs abnormal graphs are also included. Sections are covered in bite size chunks with easy navigation should you need to look up something in a hurry - an essential book to have in your pocket.
