This book provides a multi-disciplinary framework for developing and analysing health sector reforms, based on the authors' extensive international experience. It offers practical guidance, and stresses the need to take account of each country's economic, administrative, and political circumstances. The authors explain how to design effective government interventions in five areas - financing, payment, organization, regulation, and behaviour - to improve the performance and equity of health systems around the world.

又翻出来看了一下，对小白非常友好一本书（逻辑和话术）//equity真的是一个永恒的话题//不要再说health education没用，它可是控制柄里最好变革的因素了
