A successful speech depends very much on how the ideas are arranged. It is not as simple as just finding some good jokes to deliver. When preparing an important speech where you will be expected to be funny, it is essential to learn that it's not what you say but where you plan to say it. With this book - the only book that offers such detail - readers can stand with confidence and know that even if they fluff their lines, the structure of their speech will ensure their success.
