The body of a beautiful student is found nude and frozen, concealed within a snowbank for days on a New England college campus. Why hadn't anyone reported her missing? Detective Spencer O'Malley had met the girl, Kristina, only a day prior to her death. Nearly falling in love with her on this chance meeting, he learns more about her life through his investigation of her mysterious demise. Kristina and her friends, all children of privilege, were supposedly close. They played, studied and occasionally slept together. Despite this, there were many secrets hidden within their relationship, more than O'Malley could have imagined.
