The major political concepts, themes, issues, movements, groups, and schools that have developed over time and shaped our modern world appear here in all their diversity, along with biographical entries and articles on the principal works of political theorists from Plato to John Rawls. Students and browsers alike will delight in the numerous entries on familiar quotations and political catchphrases, from the "banality of evil" and "Big Brother" to the "war of all against all." Sidebars discuss the work of major political thinkers in the context of particular entries.
