This anthology gathers together, for the first time the most influential architectural texts from the Nordic countries: Denmark, Finland, Norway, and Sweden. Many of the texts appear for the first time in English, making them available to a worldwide

readership. These texts were written between 1920 and 2007 by architects who lived and worked in the Nordic countries. The book is structured in sections by country with supportive introductions by regional experts. The reader can seek out common themes of space, place, materials, etc across nations or approach the material chronologically.
