The Aftermath of Hurricane Katrina examines the hurricane's effects on traumatized children's academic progression; socialization; life opportunities; and social consciousness. Professor Dorothy Singleton presents improved teaching strategies and methodologies for working with traumatized children in any grade level. As writers gathered information for this book, several realized the need to better comprehend how this environmental tragedy has disrupted the lives of groups already politically and economically marginalized. This study features a range of information about these social groups including: history; culture; family life; and the day-to-day challenges faced by those still suffering from the hurricane's aftermath.
