Throughout the 1980s, Scottish-born Robert Millar enjoyed huge success as a professional cyclist. He won the Tour of Britain, and during the 1984 Tour de France was crowned King of the Mountains and placed fourth overall, the highest rank a Briton has ever reached in the world's toughest cycle race. When his career began to wane in the 1990s, Millar quickly removed himself from public life and has been heard from little ever since. Through interviews with friends, acquaintances, and cycling colleagues, this intriguing biography unravels the mystery behind the maverick

Scotsman, arguably one of the greatest enigmas in a sport full of remarkable individuals.
