Fidel Castro is dead of a sudden heart attack. The Russians, anxious to regain their influence in the Western hemisphere, are about to install their stooge, Caesar Valles, as the new President of Cuba. Only the members of La Causa, a dedicated group of Cuban patriots, know that Valles is an enemy of the people. They enlist the aid of an idealistic American Senator, Bob Grant, to help them defeat Valles and install their man, General Maya, as the new head of Cuba. Grant's efforts to alert the American government to the dangers of supporting Valles could end his career, and perhaps his life. Shuttling between the United States and Cuba, Embrace the Serpent is full of inside information from the wife of a former Vice President and her sister.
