For weed control courses with emphasis in turfgrass science and for students majoring in landscape plant/ornamental horticulture. Weed Control in Turf and Ornamentals provides thorough coverage of weeds that are important in turfgrass and

ornamentals-plant communities. The herbicides used in these plant communities are thoroughly treated with respect to their action and metabolism in the plant, their fate in the environment, and proper application methods. Additionally, weed control measures are covered with special emphasis on the safe and effective use of herbicides.
