Rehabilitation in Cancer Care is an essential clinical resource for all Allied Health Professionals working within or entering this specialist area. It provides practical guidance for the rehabilitation of people with cancer or those receiving palliative care.

As well as explaining the key skills required at every stage of the cancer journey, the book specifically offers advice on diagnosis, treatment, management and effective interventions. Furthermore the role of each member of the interdisciplinary team is clearly explained at each stage, as is the importance of team work and holistic care.

Section 1 introduces the reader to the rationale for the rehabilitation of people with cancer or those receiving palliative care, Section 2 looks at the multi-professional management of common cancers and Section 3 looks at symptom management.
