This book provides a comprehensive discussion of issues related to the structure and stability of the Hong Kong banking sector, using economic theory and advanced empirical econometric techniques. It is particularly useful for readers who are interested in studying, and learning how to assess, the efficiency, competition, and performance, as well as the risk and capital adequacy aspects of a banking sector in general, and of the Hong Kong banking industry in particular. Recent developments in the industry are covered, providing up to date information of the sector, including the market structure and risk management
