isbn:9781933264356

In this book, field engineer Gregory Barnett points out problems with the way automotive fires are investigated. Mr. Barnett guides you through the proper techniques of vehicle fire analysis and investigation, typical vehicle fires and burn patterns, and indicators of arson in auto fires. He teaches you how to tell the difference between flame-resistant and flammable materials, the flammable liquids contained in cars, auto electrical systems and related fires, and more. This edition contains a brand new section on alternative fuel vehicles and the types of fires associated with them. He covers the current safety standards for autos, in the United States, in a clear and easy to follow manner. He gives you important information on functioning as a witness in court on auto fire cases. This edition also contains a brand new DVD with additional information and hours of video footage on auto fires and auto fire investigation.
