This volume presents frontier reviews of recent developments in bioactive natural products in cutting-edge areas by eminent experts in their respective fields. It is an essential addition to this important series on Natural Products Chemistry, generally acknowledged to be the leading series on this topic. . The first seven reviews cover recent developments in the field of bioactive marine natural products. . Additional coverage includes Novel Domino reactions; medicinal plants and phytochemicals; recent developments in bioactive natural peptides; the chemistry and pharmacology

of natural cyclic lipopeptides; and the biological activities of Salvia . . The text includes a comprehensive review of biologically active compounds of semi-metals such as boron, silicon, arsenic, selenium and tellurium.
