This book will describe recent developments, as well as the prospects and challenges facing 3D moving picture systems and devices, including binocular, multi-view, holographic, and image reproduction techniques. Optical systems, display instruments, and image capture techniques will be covered. The online supplement will include full color movies of experiments describing recent advances in 3D movies. This is the first state-of-the-art book on this subject that efficiently integrates the background material with new advances and applications and includes movies of 3D display systems.
