The concept of individual criminal responsibility for core international crimes is, by now, a well-established principle in international criminal law. However, while the general principle behind the concept is by and large unproblematic, its practical application underscores its complexity. The aim of this book is to examine three pertinent issues relating to the concept of individual criminal responsibility for core international crimes: the joint criminal enterprise doctrine; the defining criteria of international criminal courts, for the purposes of an evaluation of the lifting of state official immunity for core international crimes, in the light of the findings of the ICJ in the Arrest Warrant case; and, the imposition of individual criminal responsibility for terrorism as a crime against humanity, both in international law and in relation to the ICC Statute.
