"Living Buildings" celebrates the 50th Anniversary of Donald Insall Associates, the Practice founded by distinguished British architect Donald Insall, a leading exponent in the field of Architectural Conservation. Probably best known for the restoration of

Windsor Castle after a devastating fire in 1992, the team's dedicated work has ensured the longevity of many of Britain's national treasures. This book presents a detailed examination of a painstaking approach to architectural conservation, comprehensively illustrated by case-studies, drawings, plans and in-depth descriptions. It is designed for a wide readership among all those who love and care for old buildings and appreciate good new design in sensitive areas.
