"Arrangements" is the fifth volume in the successful series "Creativity with Flowers" of Per Benjamin, Tomas De Bruyne and Max van de Sluis. Again, the designers of Life3 share their expertise and ideas, this time reflected in wonderful arrangements. They introduce the expressiveness of floral design, each from his own recognisable and individual style. By means of step-by-step instructions and photographs, they teach you all the tricks and techniques, with comments and personal thoughts on design, technique and the emotional aspect of each arrangement.
