Most Americans persist in believing that poverty results primarily from individual deficiencies: people are poor because they lack intelligence, determination, and skills. In opposition to this dominant, individualistic view, *Poverty and Power* proposes that American poverty is a structural problem, resulting from the failings of the political economy, not the failings of the poor. In *Poverty and Power* Edward Royce argues that the current poverty problem originates from changes in the larger economic, political and cultural landscape and from a corresponding shift in the balance of power that has worked to the advantage of business over labor.
