The redistribution of land has profound implications for women and for gender relations; however, gender issues have been marginalised from both theoretical and policy discussions of agrarian reform. This book presents an overview of gender and agrarian reform experiences globally. Jacobs highlights case studies from Latin America, Asia, Africa and eastern Europe and also compares agrarian and land reforms organised along collective lines as well as along individual household lines. This volume will be of interest to scholars in Geography, Women's Studies, and Economics.
