Written primarily for third and fourth year medical students, Toxicology Recall is a complete, concise review of clinical toxicology. The book is written in the rapid-fire question-and-answer format of the Recall Series , with the question appearing on the left side of the page and the answer appearing on the right. Mnemonics and reference charts further aid in rapid review. Major sections cover evaluation of the poisoned patient, medications, drugs of abuse, environmental and industrial toxins, heavy metals, pesticides, chemical agents of terrorism, natural toxins, therapies, and visual diagnosis in medical toxicology.
