装帧:Hardcover

isbn:9780444514493

"Structure and Dynamics of Macromolecules: Absorption and Fluorescence Studies" is clearly written and contains invaluable examples, coupled with illustrations that demonstrate a comprehensible analysis and presentation of the data. This book offers practical information on the fundamentals of absorption and fluorescence, showing that it is possible to interpret the same result in different ways. It is an asset to students, professors and researchers wishing to discover or use absorption and fluorescence spectroscopy, and to scientists working on the structure and dynamics of macromolecules. Includes key features such as: offers concise information on the fundamentals of absorption and fluorescence; critically reviews examples taken from previously published literature; and highly illustrated, it is suitable for academic and institutional libraries and government laboratories.
