"Macromedia Studio MX 2004 All-in-One Desk Reference For Dummies" provides a one-stop reference for users looking to harness the power of this Web building suite.

The book covers each of the core applications in Studio MX including Dreamweaver, Flash, Freehand, Fireworks, ColdFusion and, newly added to this edition, Contribute. "Macromedia Studio MX 2004 All-in-One Desk Reference For Dummies" also contains coverage on using all the applications together in a single Web building project as well as an overview of the basics of good Web design. This book, like the product itself, should appeal to both professional and hobbyist Web builders who want a single product that can do the work of six or seven separate products.
