著者:Lyndon Edwards

出版者:Butterworth-Heinemann

出版时间:1990-08-24

装帧:Paperback

isbn:9780750627542

This substantial volume, supplied with a data card index(with notes and diagrams showing manufacturing processes) closely connects the theoretical and practical aspects of manufacture.

It examines the various ways of shaping materials, and then goes on to discuss how decisions on design, process and materials can impact on a highly competitive market.

Individual Sections(which are self contained) comprise Material Principles & Practice, Manufacturing with Materials, Structural Materials and Electronic Materials.
