Linux users can now control their homes remotely! Are you a Linux user who has ever wanted to turn on the lights in your house, or open and close the curtains, while away on holiday? Want to be able to play the same music in every room, controlled from

your laptop or mobile phone? Do you want to do these things without an expensive off-the-shelf kit? In Smart Home Automation with Linux, Steven Goodwin will show you how a house can be fully controlled by its occupants, all using open source software. From appliances to kettles to curtains, control your home remotely! What you'll learn * Control appliances like kettles and curtains both locally and remotely. * Find and harness data sources to provide context-aware living. * Hack/change existing hardware/software to better fit your needs. * Integrate various technologies into a function greater than the whole. * Set up a home network, for both network and audio/video traffic. Who this book is for This book is for amateur and professional Linux users who want to control their homes and their gadgets! Table of Contents * Appliance Control * Appliance Hacking * Media Systems * Home is Home * Communication * Data Sources * Control Hubs

评论

你可以关注计算机各个领域，你就可以成为控制一切的Geeker

非常坑，幸好是看的电子版。

前面讲了一些X10那类不够智能的东西，后面倒是开始讲Linux了，但你丫的来科普Linux的吗？什么邮件自动回复这类的难道也能被归为智能家居么？而且几乎全是软件。我说没有软硬结合，你智能家居个毛啊呵呵。两分不能更多
