Killian Kendall's life is changing faster than he can keep up. He's graduating from high school, breaking up with his boyfriend, and starting a new job with a private investigator. He's barely settled at his new desk when his ex-boyfriend calls with a desperate plea for help. He wants Killian to prove his new boyfriend is innocent in the shockingly violent murder of his abusive father. Killian reluctantly agrees to take the case, little knowing how complicated - and dangerous - things will become before it's over. On the home front, Killian's surrogate parents decide to buy a historic mansion and turn it into a bed and breakfast. The house comes with a rich history... and maybe a ghost or two. Killian doesn't want to believe in such things, but he's quickly becoming convinced that something terrible happened to the home's original owners. The century-old mystery both terrifies and tantalizes Killian. In the end, he may be the only one who can uncover the truth.
