《钱伯煊妇科证治(英文版)》内容简介： This book discusses 54 of the most common female disorders and presents their etiologies, signs and symptoms, treatment

principles formulas, and formula analyses in a clear and concise manner. Comments are added after the discussion of each disease, reflecting the author's extensive clinical experience in the diagnosis and treatment of gynecological and obstetrical diseases. The author of this book, the late Qian Bo-xuan, was an expert in Treating women's disorders, and used distinctive and effective methods for preventing miscarriage and for treating infertility. This book and Case Studies in Gynecology are companion texts designed to provide insight into Qian Bo-xuan's clinical thought process.
