Learning that her aunt is being blackmailed, school mistress Iphigenia Bright boldly palms herself off as the mistress of the Earl of Masters, whom she believes dead by the hand of the same blackmailer. She succeeds admirably-until Marcus Valerius Cloud, the dead earl, suddenly walks into the room and throws her plans, and her life, into passionate chaos. Sprightly, funny, and highly sensual, this story harks back to the earlier Quick historicals (Ravished, Bantam, 1992). Quick is a household name to readers of the historical romance subgenre; she produces similarly fast-paced contemporaries under her own name, Jayne Ann Krentz. Quick aficionados might also enjoy reading Julie Garwood and Judith McNaught.

作者介绍:

Jayne Ann Castle Krentz with her seven pennames is considered a pillar in the contemporary romance genre. For some years, she only uses three pennames for each of three different periods from time: "Jayne Ann Krentz" (her married name) from the present, "Jayne Castle" (her birth name) from the future and her most famous penname: "Amanda Quick" from the past. She is famous for her work ethic, beginning her writing by 7 am six days a week. Her heroines never are damsels in hardships, they are often heroes. Her novels also contain mystery or paranormal elements.
