"Godschild Covenant" is set against a global tribulation caused by the planet Nibiru (Planet X) in 2012. In the midst of this maelstrom, the dubious characters who've lurked in the shadows of Anthony Jarman's life now come forward to propel the story at a breathtaking pace. Likeable and gifted with psychic abilities, Anthony enjoys political success until his enemies manage to conscript him into the hopeless role of a "releaser." In the midst of this dark passage, destiny recasts his fate when he meets Tanya. Beautiful and dynamic, but sad, she captures Anthony's interest at first sight. The attraction is mutual, but Tanya cannot yield as easily. The loss of her family still pulls her soul towards lonely tears, away from her pressing need for a new future. As they struggle with their feelings, the ghost of an old love from Anthony's past returns to bond them together in the service of a desperate cause. DOI:

10.1572/yowbooks.gcron The Science Behind Godschild Covenant Godschild Covenant: Return of Nibiru, is rooted in a realistic catastrophe scenario based on the impending flyby of a planet the Sumerians called Nibiru. The Egyptians called it the "Destroyer," and the Mayans warn us that this "Red Comet" will return in 2012. In researching this book, author Marshall Masters, a former science feature producer for the Cable News Network first researched current solar system observations and then compared those findings with historical accounts in the ancient texts of the Egyptians and Sumerians. Nibiru and the Ancients Founded in the area of modern day Iraq, Sumer is the oldest known civilization, and the Sumerians wrote extensively about Nibiru. According to their accounts, it orbits our sun every 3600 years. Reddish in color, it is approximately 5 times the size of Earth. Further parallels to these accounts are also found in ancient Egyptian and Mayan records as well. A similar object was also documented in the Egyptian Texts of the Bronze Age. This 3600-year old work was penned by Egyptian academics following the Exodus. They called it the "Destroyer" and say it caused the Biblical disasters of Noah's Flood and the Ten Plagues of Exodus. They also warn that it will return in the near future. The Mayans offered the same warning. They called this object the "Red Comet" and told us its return will mark the beginning of the next Mayan Calendar on December 21, 2012. Like the Egyptians, they feared the natural disasters caused by this object and kept a constant vigil on the planet Venus for any sign of its return. Nibiru and 2012 Today, we not only observe Venus, but the entire solar system as well, and what we're seeing is troubling for some. In the last 75 years, the effective energy output of our sun has increased 0.4%, causing the most violent solar activity in recorded history. According to NASA, the next solar cycle will reach its maximum in 2012, and it will be stronger than the last. Meanwhile, as the global warming debate continues here on Earth, astronomers have observed significant surface warming on Mars and Pluto at levels that could cause an extinction event here on Earth. Additionally, there is a sharp increase in atmospheric perturbations and a host of new X-ray and radio emissions on the other planets in our solar system, as well.
