装帧:Hardcover

isbn:9781573928847

Issued on the 25th anniversary of the Committee for the Scientific Investigation of Claims of the Paranormal (CSICOP), this book brings together personal statements by the leading sceptics of the world. CSICOP, the first major organisation of sceptics on the contemporary scene, is worldwide in scope and is dedicated to the sceptical evaluation of both paranormal and religious claims in the light of scientific inquiry. All of the articles are original and written especially for this collection. Many pieces are autobiographical; others reflect on the current state of research into paranormal claims. The contributors focus on ESP and parapsychology, astrology, UFOlogy, the difference between science and pseudoscience, alternative medicine, magic, near-death experiences, spiritual energy, Bible codes, and religious claims that purport to have empirical foundations.
