This powerful repertoire gives players a complete defense system against any King Pawn opening, the most popular first move in chess. Based on the Caro-Kahn, a favored weapon of great players, this guide provides chess fans with the skills to play an aggressive and strategically defensive game from their very first play. Players of Black will delight in this reference as White 1.d4 moves are rendered useless by the numerous tips from experts, clear explanations, up-to-date professional analyses, and detailed diagrams found in Complete Defense to King Pawn Openings.
