Lambert is more than a resort on an island. It's a hidden hideaway where the super-rich go to find solace from their billionaire empires and super-rich life styles. At this secret haven, guest elite come and go at will, to unwind, relax, and be pampered in every imagined way. A place where money is never an issue, and, of course, it's scandal-free. That is, scandal-free until a double murder is discovered on the island, implicating the wife of one of the wealthiest and most powerful men in the world.
