Editorial Reviews

Amazon.com Review

The unbridled greed, pettiness, buffoonery and intellectual gobbledygook in the world of higher scholarship are the topics of this thorough and thoroughly funny roman a l'English department. It's interesting for a couple of reasons, aside from its humor and spoofiness: it's an insider's view of things -- always the best kind -- and it takes its old-fashioned time telling a story, complete with reasonable digressions about the state of literary criticism and what may or may not be a realistic view of the academic life.
