Another good story about Jessie the very active Grandmother who can not sit back and watch things happen she needs to be right in the mittle of them . This Book is about that just sit back and read this it is very entertaining to say the least but also show's so many things can be done by anybody if they only can put there mind to it and just go aheat and do it . May be after you have read this Story than you can see what this Author had in mind to let most of you know out there . Monika Grunwald -Schutz
