Cyborgs@Cyberspace is a compelling and innovative analysis of technology from a cultural perspective. Arguing that humans have always been technological as well as cultural beings, David Hakken calls for a fundamental rethinking of the traditional separation of anthropology and technical studies. Drawing on three decades of research on contemporary technological societies, this book outlines a fresh way of thinking about technology and offers an ethical and political response to the challenge of truly living as "cyborgs" in the age of cyberspace.
