The lhe Legend of God and Pegasus perfectly blends fun, wide vision, and horse sense. This zany, relaxing read is a must for anyone who enjoys an energy boost, friendship, horses, and new points of view. The Legend is the creation myth of the horse. The story is recited by the herd at the birth of each new foal. Throughout time, it has been passed down from one generation of horses to the next The legend cronicles God and Pegasus' uplifting adventures in the Heavens as God went through the process of creating our world-Earth. God was lonely. He created Pegasus to have someone to brainstorm with. This decision was a real winner. "You are not only my wings but the wind beneath them," He confides in Pegasus in the midst of the big bang He set in motion. Pegasus predicts that the greatest energy crisis will be spiritual rather than physical. In the book, he explains his theory and suggests ways in which we can all generate and share an abundance of this emotional fuel. Together, we can pave a road to happiness and world peace. 49 fine art black and white photographs illustrate the story
