Privacy, Information, and Technology examines how the right to privacy is implicated

by the Internet, communications media, and emergent technologies. Anyone interested in exploring this timely subject will find *Privacy, Information, and Technology* informative, readable, and engaging.

The second edition of *Privacy, Information, and Technology* features:

Background information and lucid text that explains the law and policy of information privacy in relation to computers, databases, and the Internet;

Broad coverage of government surveillance and the legal ramifications surrounding

The Fourth Amendment;

Sensory enhancement technologies;

Wiretapping;

Computer searches;

ISP records;

The Electronic Communications Privacy Act;

The Foreign Intelligence Surveillance Act;

The USA-PATRIOT Act.

A thorough examination of new and cutting-edge issues, such as:

Privacy and access to public records;

Government access to personal information;

Airline passenger screening and profiling;

Data mining;

Consumer privacy;

Financial privacy;

Significant new case decisions involving the Fair Credit Reporting Act, Privacy Act, and identity theft.

Emerging information technologies and their associated implications for individual privacy, including:

Computer databases;

RFID (Radio Frequency Identification)

Cookies, spyware, and data mining;

Updated coverage of the Foreign Intelligence Surveillance Act Amendments of 2008,

and NSA (National Security Agency) surveillance.
