

An Investigation into the Effects of Lateral Aerodynamic Asymmetries, Lateral Weight Asymmetries, and Differential Stabilator Bias on the F-15 Directional Flight Characteristics at High Angles of Attack

Report supplied by

State of Department of Defense Initiatives Framework (DoDIF) Implementation within the National Defense Strategy Context (NDS)

An Investigation into the Effects of Lateral Aerodynamic Asymmetries, Lateral Weight Asymmetries, and Differential Stabilator Bias on the F-15 Directional Flight Characteristics at High Angles of Attack [下载链接1](#)

著者:David R. Evans

出版者:Storming Media

出版时间:1996

装帧:Spiral-bound

isbn:9781423583431
