著者:Ted Goertzel

出版者:Basic Books

出版时间:1996-11-29

装帧:Paperback

isbn:9780465006731

One of the few unquestioned greats of twentieth-century science, Linus Pauling was the only person to receive two unshared Nobel Prizes—one in chemistry, for deciphering the quantum physics of large molecules, and one in peace, for helping to end nuclear bomb testing. His brilliance was allied with a certain stubbornness, and when he died in 1994, at the age of 93, he was embroiled in controversy regarding his advocacy of vitamin C as a treatment for cancer. Based on thirty years of interviews, this masterful biography is filled with insights into the life and work of this complex, fascinating man.
