This text offers an ideal introduction to a course in Financial Accounting. It follows a traditional organization for a course combining both "preparer" and "user" approaches. Focusing on 4 key areas that are important to any business: Corporate Governance, Risk and Control, Ethics and Fundamentals, Jane L. Reimers carefully integrates recent changes in the post-Enron business environment AND presents strong accounting fundamentals, enabling students to grasp a true understanding of the Financial Accounting world. "Financial Accounting" is also accompanied by a rich resource package for both students and lecturers.
