

Python Scripting for Computational Science 3e

[Python Scripting for Computational Science 3e 下载链接1](#)

著者:Hans Petter Langtangen

出版者:Springer Berlin Heidelberg

出版时间:2009-12-09

装帧:Paperback

isbn:9783642093159

With a primary focus on examples and applications of relevance to computational scientists, this brilliantly useful book shows computational scientists how to develop tailored, flexible, and human-efficient working environments built from small scripts written in the easy-to-learn, high-level Python language. All the tools and examples in this book are open source codes. This third edition features lots of new material. It is also released after a comprehensive reorganization of the text. The author has inserted improved examples and tools and updated information, as well as correcting any errors that crept in to the first imprint.
