著者:Sim Van der Ryn

出版者:Sierra Club Books

出版时间:1991-8-13

装帧:Paperback

isbn:9780871566294

This classic text is a practical vision of how different types of communities can make the transition to a sustainable way of life that balances production and consumption, reduces resource waste and produces long-term social and ecological health.

Our old patterns of growth are built on isolation—an isolation from the environment, an isolation between activities and ultimately an isolation between individuals. Whether city or suburb, these qualities of isolation are the same. Buildings ignore climate and place, uses are zoned into separate areas, and individuals are isolated by a lack of convivial public places. Sustainable patterns break down the separations; buildings respond to the climate rather than overpowering it, mixed uses draw activities and people together, and shared spaces reestablish community.— from Sustainable Communities

作者介绍:

Peter Calthorpe has been instrumental in redefining the models of urban and suburban growth in America over the past three decades. His long and honored career in urban design, planning, and architecture began in 1976, combining his experience in each discipline to develop new approaches to urban revitalization, suburban growth, and regional planning.
