isbn:9781586850852

Near the end of the last Ice Age, North America was populated by cultures-- Clovis and Folsom-- that left little record of their existence other than exquisite stone weapons and tools.

Their tools have been found in many different locales. Some of the finest artifacts were discovered in the Clovis and Folsom sites, while others were found in the High Plains east of the Rocky Mountains. This poster features artifacts found in the High Plains.
