"A chilling, in-depth examination of the rapidly emerging global crisis."-In These Times
In Las Guerras del Agua (Water Wars), Vandana Shiva reveals how many of the most important conflicts of our time, most often camouflaged as ethnic or religious wars, are in fact conflicts over scarce but vital natural resources. Using her remarkable knowledge of science and society, the globally renowned physicist and ecowarrior analyzes the historical erosion of communal water rights. Whether it's the international water trade, damming, mining, or aquafarming, Shiva exposes the destruction of the earth and the disenfranchisement of the world's poor--and demands nothing less than the full restoration of our natural rights to a precious common good.
