

黎曼几何学 正交标架法

[黎曼几何学 正交标架法_下载链接1](#)

著者:E. 嘉当

出版者:科学出版社

出版时间:1964

装帧:21cm

isbn:9780412041525

作者介绍:

Élie Joseph Cartan (9 April 1869 – 6 May 1951) was an influential French mathematician, who did fundamental work in the theory of Lie groups and their geometric applications. He also made significant contributions to mathematical physics, differential geometry, and group theory.

He was the father of another influential mathematician, Henri Cartan.
