Neogeography combines the complex techniques of cartography and GIS and places them within reach of users and developers.

This Short Cut introduces you to the growing number of tools, frameworks, and resources available that make it easy to create maps and share the locations of your interests and history.

Learn what existing and emerging standards such as GeoRSS, KML, and Microformats mean; how to add dynamic maps and locations to your web site; how to pinpoint the locations of your online visitors; how to create genealogical maps and Google Earth animations of your family's ancestry; or how to geotag and share your travel photographs.

评论

Neogeography目前似乎仅仅是基于技术的，或者说只是WebGIS向Web2.0方向的发展，并与Goodchild提出的VGI关系密切，它强调的是草根GIS与地理知识的获取。至于所谓的“新地理学”，与基于空间研究的地理学并无太大关联。
