New information never before published! Who actually built the Pyramids of the Giza Plateau, and why? Is there really a Hall of Records under the Giza Plateau? Are the mythological figures of ancient Egypt – Osiris, Isis, Anubis, Horus, and others, actually the same characters represented in certain books of the Old Testament? How did we evolve on this planet? Where were we before earth? On May 3, 2000, a certain three individuals independently (physically and actually) made their way to Cairo for a rendezvous. These three individuals, up to this point, had no idea as to what event was about to unfold. They only knew that their previous training and unique skills would be required. It was here that they were given the co-ordinate entry points. Two world-recognized experts on Ancient Egyptian Civilization and Sites, Howard Middleton-Jones, and researcher, James M. Wilkie, bring forth some of the most startling revelations ever imparted in the history of humankind.
