1864. Beginning his career as a newspaper editor and anonymous contributor to various publications, Trowbridge first earned a name for himself upon publication of an antislavery novel. He wrote articles for the children's magazines *Our Young Folks* and *Youth's Companion* during and after the war. One of his Civil War novels, *The Drummer Boy* begins: One evening, in the month of October, 1861, the Manly family

were gathered together in their little sitting-room, discussing a question of the most serious importance to all of them, and to Frank in particular. Mrs. Manly sat by the table, pretending to sew; but now and then the tears rushed into her eyes, and dropped upon her work, in spite of all she could do to keep them back. Frank watched her with a swelling breast, sorry to see his mother so grieved, and yet glad in one little corner of his heart; for, although she had declared that she could not think of granting his request, he knew well, by those tears of hers, that she was already thinking of granting it.
