Haley Fry and her twin sister, Jamie, have been compared to one another since birth. Haley is the quieter twin, a lover of music who prefers solitude to spending time with multiple friends. A prodigy on the saxophone, she dreams of a career as a musician. Jamie, on the other hand, is the athlete of the family who prides herself on her popularity and how many boys are after her. The twins' parents, Larry and Maggie, place more trust in Haley because of her calmer nature. They expect the unexpected from Jamie, but not Haley. When Larry and Maggie learn that sixteen-year-old Haley is pregnant, they are shocked. Surprising everyone, but mostly herself, Haley faces a life-changing decision: Does she abort the baby or become a teenage mother? "Choice" presents Haley's dilemma in a unique way. The first half of this novel narrates what happens when Haley chooses an abortion, while the second half reveals Haley's life when she chooses to keep the baby. Told through the eyes of the entire family, "Choice" illustrates the tough decisions involved in a teen pregnancy.
