PARASPHERES 2

EXTENDING BEYOND THE SPHERES OF LITERARY AND GENRE FICTION

Following on the success of the first ParaSpheres, this second anthology in the series continues to explore the porous boundary between mainstream literary fiction and the genres of fantasy. horror, and science fiction. Containing works by new writers, established literary writers, and notable writers who are willing to break from their expected mode—this compilation will enthrall readers who are interested in non-realist fiction and the ways that it challenges the psychological, social, political frames that we use to construct reality, as well as all readers who are simply excited and enlivened by excellent writing that opens the world to them afresh.
